

Unicode Support in Trac

Trac encodes all text using `UTF-8`, including text in tickets and wiki pages. Internal processing of text uses true `Unicode` representations. As such, it supports the most commonly used character encodings.

If the default encoding of your source code repository is not UTF-8, you can specify it in `[trac] default_charset:`

Ensure that your `database` stores its data in UTF-8, otherwise results may be unpredictable.

To convert your database to UTF-8, the easiest way is to create a dump of the database, convert it into UTF-8, for example using `iconv`, and then re-import it.

Examples

Arabic

???? ???? ???? ?? ??????? ?????????? ???? UTF-8? ??? ?? ??? ????????? ?????????? ?? ????? ?????? ???????.

Bulgarian

????????????? ???? ?????? ???

esky

??etina v kódování UTF-8, ?ádný problém.
