

Unicode Support in Trac

Trac encodes all text using [UTF-8](#), including text in tickets and wiki pages. Internal processing of text uses true [Unicode](#) representations. As such, it supports the most commonly used character encodings.

If the default encoding of your source code repository is not UTF-8, you can specify it in `[trac] default_charset`:

```
default_charset = gbk
```

Ensure that your database stores its data in UTF-8, otherwise results may be unpredictable.

To convert your database to UTF-8, the easiest way is to create a dump of the database, convert it into UTF-8, for example using [iconv](#), and then re-import it.

Examples

Arabic

UTF-8

Bulgarian

[REDACTED]

lesky

■ ešťina v kódování UTF-8. žádný problém.

Chinese

Traditional: ■■■■■, ■■■■■

Simplified: ████

Croatian

Ako podržava srpski i slovenski mora podržavati i Hrvatski - ■■žš■■žš■

English

Yes indeed. Trac supports English. Fully.
